Operation and effects of the generalized system of preferences

Scheme of the European Economic Community: 1991

Note by the UNCTAD secretariat

1. The present document contains information from published sources on the operation of the scheme of the EEC in 1991. 1/ It relates to the application of Fixed Duty-free Amount (FDFA), community ceilings and/or quotas for individual beneficiaries. Subsequent information will be published as it becomes available.

2. During 1991, some 74 products were affected by individual tariff ceilings: consisting mostly of chemical and petrochemical products, pneumatic tyres of rubber, leather products, footwear, household articles of earthenware, glassware of a kind used for the table, copper bars, microwave ovens, prepared unrecorded media for sound recording, reception apparatus for radio-telephony, television receivers, toys, 2/ textiles and clothing. 3/. Furthermore, a total of 119 sensitive products were affected by tariff quotas, FDFA and/or Fixed Reduced Duty Amount (FRDA). It should be noted that 42 of these sensitive products were also affected by the tariff ceiling mentioned above. Sensitive products affected were: preserved pineapples, chemical and petrochemical products, trunks, suitcases, tanned and dressed furskins, fibreboard of wood, plywood, veneered panels, footwear with outer soles of rubber and uppers of leather, glazed ceramic flags and paving, tableware

of porcelain or china, drawn glass, float glass and surface ground glass, rovings, certain iron and steel products, aluminium bars, wire, handtools, tools, air or vacuum pumps, colour televisions, electric capacitors, integrated circuits, diodes, other tractors, shaving brushes, pincers, motor vehicles, glass parts for electrical lighting, textile products. 4/

3. In addition, 12 non-sensitive products were also affected by limitations. Non-sensitive products affected were: Portland cement, certain chemicals or petrochemical products, copper bars, bicycles and other cycles. 5/

4.. While this short account deals with the operation of the EEC GSP scheme during 1991, for six products, the EC Commission had ended the charges against the tariff ceilings opened, in the framework of the EEC GSP scheme of 1990, in respect of certain products originating in Brazil, Hungary, India, Mexico, China and Pakistan. 6/

5. Except products seen under paragraph 4 and with some five other exceptions, 7/ all the above-mentioned products, for the remainder of the year, had normal MFN rates re-established for imports from all beneficiaries (in the case of two products) and from single countries concerned. It should be noted that in the case of certain products considered as highly sensitive, for which tariff quotas or FDFA were set up for half year, the MFN rates were re-established for the corresponding remaining half year.

6. The limitations were applied as follows: all beneficiaries (2 products); China (92 products); Czech and Slovak Federal Republic (59 products); Poland (47 products); Hungary (39 products); Pakistan (35 products); Thailand (33 products); Brazil (31 products); India and Indonesia (28 products each); Romania (17 products); Hong Kong (13 products); Bulgaria and Malaysia (11 products each); Singapore (8 products); Philippines (7 products); Mexico (6 products); Argentina (3 products); Sri Lanka and Venezuela (2 products each); Chile and Saudi Arabia (1 product each).

7. Various official journals of the European Communities, series C of 1991, have provided information on preferential trade which reached tariff ceilings vis-à-vis specific beneficiaries but information on whether or not MFN rates were re-established was not provided. This was the case of 72 industrial products affecting 19 beneficiaries and 92 textile products affecting 23 beneficiaries. 8/

8. Further details on imports which reached quotas/ceilings or FDFA in 1991 may be found in the attached tables.

7/ In the case of products under code numbers 10.00120, 10.0595, 40.0020, 50.0120 and 40.1260, MFN rates were re-established early in January 1992.
